SIZE CHART

How to determine the right size

Please stand straight. Use a measuring tape.

Measure the under bust width with a measuring tape.

The measure has to be taken just below the bust, quite tightly but comfortable enough.

For the cup size please measure the bust circumference.

The measure has to be taken on the widest part of the bust with a fairly loose measuring tape in order not to misshape or compress the breasts.

For the panties size please measure the circumference on the widest part of the hips and the backside.

Check out your bra/panties size with the tables below.
